Flexis aims to revolutionize urban logistics

by offering innovative sustainable and efficient solutions to the market

The development of a new generation of electric Light Commercial Vehicles and the associated services

An objective to become the European and global champion of solutions for clean and efficient urban logistics.

The privileged partner for professional logistic operators, with solutions that are easy to integrate into their end-to-end operations.

Providing end-to-end solutions to urban logistics players in order to answer all their pain points.

20%+ TCU reduction thanks to hardware and software optimization

Our Market

Size and Growth Potential

- ✓ There is a booming demand for clean logistical solutions, driven by increasing urbanization and the development of e-commerce: the number of eLCV's sold per year is expected to grow from 0.1 million in 2023 to 0.9 million in 2030, representing a yearly growth rate (CAGR) of 30%.
- ✓ A stable market structure with limited competition from Chinese players.
- ✓ Strong market shares for the Renault Group and Volvo Group.

Strategic Market Coverage

- ✓ Targeting key European markets such as France, Germany, and the UK, where policies favoring decarbonization and urban efficiency are driving demand: 171,000 eLCV's are expected to be sold in France, 112,000 in Germany, and 168,000 in the UK in 2030.

Segmentation and Customization

- ✓ Targeting of the key actors of the last mile delivery market including Third-Party Logistics players (3PL), retailers, and major delivery companies.
- ✓ Tailoring to customers' requirements in terms of size and digitization.

Our Solutions

Innovative EV Skateboard Platform

Cutting-edge technology allowing seamless electric driving with:

- ✓ 800V batteries
- ✓ Long driving range
- ✓ Rapid charging
- ✓ High power

Fit-for-purpose vehicles adapted to urban logistics needs:

- ✓ Superior maneuverability
- ✓ Unequaled cargo/footprint ratio
- ✓ Low floor height
- ✓ State-of-the art ergonomics to foster operational efficiency and cost-effectiveness

Software-Defined Vehicle (SDV)

Cutting-edge technology allowing seamless electric driving with:

- ✓ Flexibility and scalability through software-defined vehicles
- ✓ Seamless integration of new services and continuous updates.

BtoB-Centric Interfaces and Services

Dedicated customer interfaces:

- ✓ Streamlined operations
- ✓ Tailored customer support
- ✓ Fit for purpose-built solutions and services
- ✓ Optimized Total Cost of Use (TCU)

Our Approach

A Focused and Independent Entity:

An independent company supported by robust R&D and engineering capabilities, ensuring agility and innovation.

Secured Resources and Operational Excellence:

Reliability in supply chain, manufacturing, and critical services, ensuring consistent production and delivery.

Strong Environmental Social and Governance (ESG) Commitment:

Strong commitment to zero-carbon setup and contributions to smart cities initiatives, aligning with ESG principles.

Rapid Transition to Electric Vehicles to Meet:

- ✓ Stringent CO2 regulatory requirements (ICE ban expected by 2035)
- ✓ Increasing city access regulations
- ✓ Rising number of Low Emission Zones (LEZ) and Ultra Low Emission Zones (ULEZ)
- ✓ ESG commitments from fleet operators and customers

An Expanding Network

Our stakeholders' partnerships expand our reach and influence, enabling us to provide integrated solutions globally.
